

Update on the current situation on security of supply in the EU: Data on the use of LNG

**Wim Groenendijk
GLE President**

Gas Coordination Group, Brussels, 16 September 2014

Total send out capacity of large-scale LNG terminals: 185 bcm/year

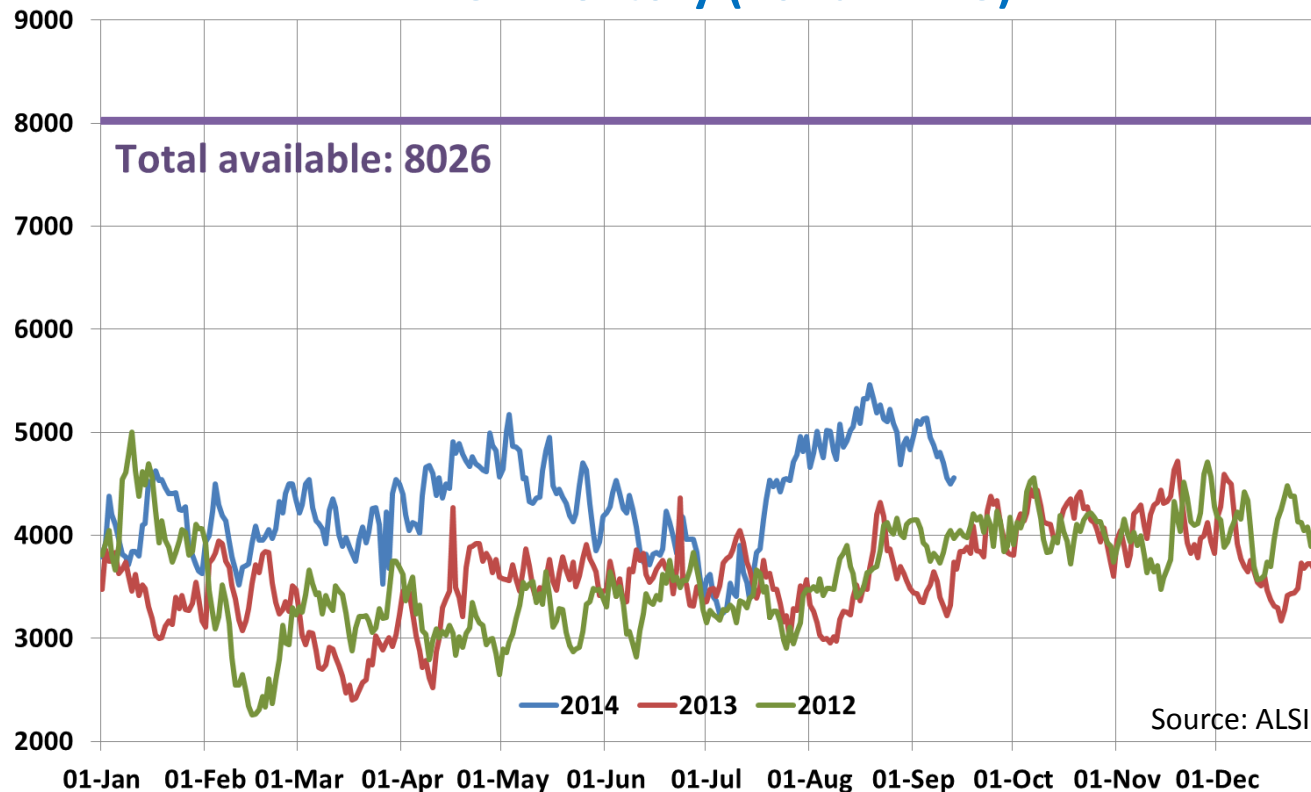

- On 3 December 2014, the Lithuanian LNG terminal is expected to be commissioned. It increases the EU annual regasification capacity by 4 bcm to 189 bcm
- In average just 16% of total daily LNG send-out used from January to August 2014

Higher LNG storage inventory in 2014

- European LNG inventory as of 12 September 2014: 4.5 mcm LNG
- Lithuania will increase the European LNG storage capacity by 0.17 mcm to 8.2 mcm LNG

LNG inventory (10³ cm LNG)

GIE is proud to support

Gas Naturally

GN is a campaign to showcase the essential role of natural gas in the forthcoming energy revolution. The mitigation of climate change has become one of the most important issues for the gas industry.
