

**PRESS RELEASE**

14 August 2019

## **LNG services continue to develop rapidly in the EU**

GIE publishes the annual updates of the **GLE LNG Services Inventory** and the **GLE List of Services**, part of its market transparency commitments along with ALSI Transparency Platform, Transparency template, LNG Maps and associated databases.

The services databases provide, in a condensed form, relevant information regarding the services offered in each LNG terminal of each GLE member, along with investments status and future projects:

- The **GLE List of services** gives an overview, terminal per terminal, of all the offered services, from the standard services to the most recent ones developed in response to the market dynamic.
- The **New LNG Services Inventory** focus on the recent services and provides, also terminal per terminal, quantitative actual and historical data. It covers large scale services (**Reloading, Transshipment**) as well as small scale services (**Small-scale ship loadings, Truck loading, Rail loading...**), providing details on technical characteristics, yearly quantities, etc.

The data are particularly useful in analyzing the evolution of the market demands, the diversity and technological options of the LNG usage and the continuously enlarging spectrum of LNG utilization options. **Overall, the data show that LNG services continue to develop rapidly.**

The **GLE LNG Services Inventory** and the **GLE List of Services** are available at:

### **Note to Editors**

**Gas LNG Europe (GLE)** currently comprises 16 European LNG terminal operators from 9 countries, representing more than 90% of all the existing LNG regasification capacity in Europe. GLE is one of the columns of GIE, Gas Infrastructure Europe, the European association of the Transmission, Storage and LNG terminal Operators.

GLE is committed to promoting the development of a fully operational European internal market for LNG and the creation of a stable and predictable regulatory framework which is conducive to investments and which ensures transparency and non-discriminatory treatment.
